This course provides students with students a broad, complete, and realistic view of marketing management roles as well as its relationships within today's organizations.	Faculty Requierment
Level 4		
BUMG4110	As global competition in both goods and services intensifies, an organization's growth and sustainability depends upon how well it integrates the supply chain function into its overall planning and strategy. Thus, it is imperative for all business professionals to acquire an understanding of supply chains. Supply Chain Management deals with the chain of functions and organizations that create values for customers and	Faculty Requierment

shareholders. It involves designing and producing goods and services, the physical distribution of goods and services, and the streamlining of the supply chain components to achieve maximum efficiency and sustainability.	
BUMG4112 This course aims to develop the competencies and skills for planning and controlling projects. It covers the project management process spanning project selection, planning, implementation, monitoring and controlling. The course provides students with a thorough discussion of the managerial skills requisite to project managers, as well as the technical skills needed for the effective management of the various aspects of the project.	Faculty Requierment
BUMG4113 This course introduces the students to the theory and practice of performance management with a view to developing the capacity to plan, facilitate, assess, and improve individual and organizational performance. In addition, the course emphasizes the importance of measuring the effectiveness of human resource activities that are designed to enhance individual and organizational performance.	Faculty Requierment
BUMG4104 The course is designed to equip students with skills to develop a research proposal. The course covers the fundamentals of a research project such as research objectives and research questions, literature review, various elements of qualitative and quantitative methods, negotiating access, ethical issues, data collection and data analysis.	Faculty Requierment
BUMG4201 "This course introduces the students to the theory and practice of strategic management with a view to building and applying skills in conceptualizing strategic planning and developing actual strategic plans for various organizational settings."	Faculty Requierment
BUMG4205 This course discusses and applies principles, tools, and methods to successfully implement change and innovation within organizations. Using several perspectives to assess organizational performance ensure that students are not trapped by a single-best approach to change management. Topics outlined in this course include: strategies to design, implement, communicate and sustain change; techniques for mapping and assessing when and where change is needed in an organization; organizational development techniques; as well as barriers and enablers to fostering an environment conducive to change and innovation.	Faculty Requierment
BUMG4203 This course examines the individual and collective factors that affect the decisions that managers make in their everyday work lives. The approach is descriptive and prescriptive, that is, the focus is on how managers actually make decisions, as well as how they ought to make decisions to maximize organizational and personal outcomes. The course is divided into two main sections. The first section	Faculty Requierment

deals with individual-level processes that influence managers' decisions. The second section considers collective (that is, group or organizational) forces that affect managers' decisions.	
BUMG4204 This course is built on the fundamentals of Business Research Methods course; students are expected to conduct an independent research through which they are expected to demonstrate a command of the research process including identification of business problems, data collection, interpretation, and presentation. The area of focus will be accounting and finance.	Faculty Requierment
