

Program Learning Outcomes- Language Studies-TESOL

Master	PLO1	Critically understand the structural and semantic relations at different levels of the language system
	PLO2	Integrate students' understanding of linguistics, psycholinguistics, and sociolinguistics into SLA and FLA learning and teaching contexts
	PLO3	Demonstrate an ability to determine the instructional strategies that are most appropriate for different teaching methods
	PLO4	Design, develop, and evaluate teaching curricula and materials
	PLO5	Construct sound assessment practices and techniques that tally with classroom practice and learning outcomes
	PLO6	Identify and evaluate different learner language issues and establish appropriate ways to handle them
	PLO7	Apply acquired theoretical knowledge in teaching practice contexts through a one-semester full-fledged or simulated practicum
	PLO8	Apply acquired research skills in relation to appropriate use of scholarly research and published literature both in wider instructional contexts and for reference purposes
	PLO9	Demonstrate a sufficient competency in the four language skills that enable the students to teach and assess learners' language proficiency
	PLO10	Develop and practice communication, critical and analytical, presentation, and other relevant skills that enable students to discuss and defend any research work they present.
